SECURITY BOSS[®] MANUFACTURING LLC

Best by Design...Engineered to last

UNPARALLELED SECURITY
Form and function come together to provide security worthy of the Security Boss[®] name. A half inch insulated security panel provides double protection from weather and the unwanted.

GO AHEAD...CUSTOMIZE
We offer 10 different frame options of premium powder coated colors, giving you more flexibility to ensure the MaxSeal Pet Door[®] augments your home.

DESIGNER HARDWARE
Extras make the difference. You should not sacrifice aesthetics for function. Our door hardware is unique, stylish and selected to incorporate within any home design.

DETAILS ARE CRUCIAL
"Pet doors that cannot seal ...work against you"

MaxSeal Pet Doors[®] maintain a positive closure every time. The high powered magnets used ensure that your pet door keeps out the inclement weather and save you energy and money every day.

SPECIALIZED LOW PROFILE EXTERIOR FRAME

The exterior frame of the MaxSeal IN-Glass Model utilizes a very low profile frame that is less than 3/16" from the surface of the glass. This allows for easy gliding past fixed glass panels in sliding door systems

PREMIUM FLAPS ARE LIKE PREMIUM WINDOWS

Pet Door flaps are crucial for a high quality pet door. Flexible vinyl flaps are more pet friendly than any rigid or semi rigid flap design. Our pre-production flap treatments ensure protection from sun light degradation, performance in the most extreme hot or cold conditions and longevity.
