MaxSeal® 'Best by Design'

MaxSeal® Pet Doors are available for several types of installation. Models are available for Walls, Doors, French Doors as well as Custom Made. These High Performance doors are made to be maintained indefinitely, making them the last pet door you will need. Superior insulating and sealing are what makes our doors stand above all others. The dual flap design provides a near perfect barrier to the outside elements. MaxSeal® doors also provide incomparable security when the security panel closes off the pet opening making it the only door on the market able to withstand forcible entry.

MaxSeal® Feature Highlights

Best Insulating Pet Door	Insulated – Intruder Resistant Security Panel	UV Treated Flaps
Best Weather Seal	Reinforced Frame & Mitered Corners	Nylon Reinforced Flap Strength
Rust Resistant Components	Designer Lock & Handle Hardware	Product Longevity

MaxSeal® Door Mount Models

Easily installs into any type of door – flat or panel design. Fits any door 1 ¼" to 2" thick. Single and Dual Flap versions available

MaxSeal® Wall Mount Models

Standard model comes with 10" trim-to-fit tunnel. For thicker walls, there is a 16" trim-to-fit tunnel option. Tunnel is self-framing and strongest of any design. No bottom seams guards against moisture leaking inside walls.

MaxSeal® 'Best by Design'

MaxSeal® Custom Made

Commonly used for replacing underperforming pet doors in walls and doors. Also made to accommodate pets with special mobility needs.

MaxSeal® French Door Models

Specially made to replace one or more individual panes of glass in a true French door. Allows you to re-install the glass later after you remove the pet door.

Note: *Only can be used in French Doors that have individual panes of glass.*

How to Select the Correct Pet Door Size

When choosing a pet door size, you will want an opening that clears the back of your tallest pet by 1.5-2", and low enough to the ground to allow for easy navigation of the smallest pet. Certain dog breeds may develop arthritis or hip problems in their later years. Choosing a pet opening that is a little lower to the ground can save your dog from irritating injuries in the future.

**Allow for 1.5 to 2" in
clearance above the
pet's shoulders**

**Pet door elevated
enough to allow for
easy step over**
